

Why settle for an imitation when you can have the original?

The Whalen Vertical Fan-Coil System

Are you looking for a unit that is smaller, provides a lower installed cost, reduces maintenance, and features only aluminum supply and return grilles for a superior long-lasting appearance? The Whalen Company is your only choice.

We invented the vertical unit and specialize only in this form of air conditioning. Our exclusive riser heat-exchanger allows for cooling or heating without the use of valves or joints within the unit. When you consider the benefits of the smaller footprint and lower pumping costs, there is only one choice.

Cool

Heat

Available in two-pipe, four-pipe, and energy efficient 50/50 configurations

- Lower installed cost
- Reduced maintenance costs
- Elimination of brazed and soldered joints
- Smallest footprint
- Lower pumping costs
- Aluminum grilles — no steel access panels
